MOMENTUM
AI INSTITUTE

90 DAY PATH

If I had *90 days* to become an AI engineer

Seven courses in order. **Save this.**

INSIDE

Pages 2 and 3. The seven courses, in order, with a one line note and the full link.

Page 4. How to run the path.

Page 5. Next step.

STEPS 1 TO 4

Learn *Python*, then build with LLMs

01

CS50 Python

Language foundation.

https://cs50.harvard.edu/python/

02

CS50 AI

ML + neural nets via projects.

https://cs50.harvard.edu/ai/

03

Microsoft GenAI for Beginners

Prompting, APIs, function calling.

https://github.com/microsoft/generative-ai-for-beginners

04

DeepLearning.AI RAG

Connect AI to your docs.

https://www.deeplearning.ai/courses/retrieval-augmented-generation

STEPS 5 TO 7

Build agents. Then *measure* if they work.

05

Hugging Face Agents Course

Build agents.

https://huggingface.co/learn/agents-course/en/unit0/introduction

06

Evaluating AI Agents (DeepLearning.AI)

Measure if they work.

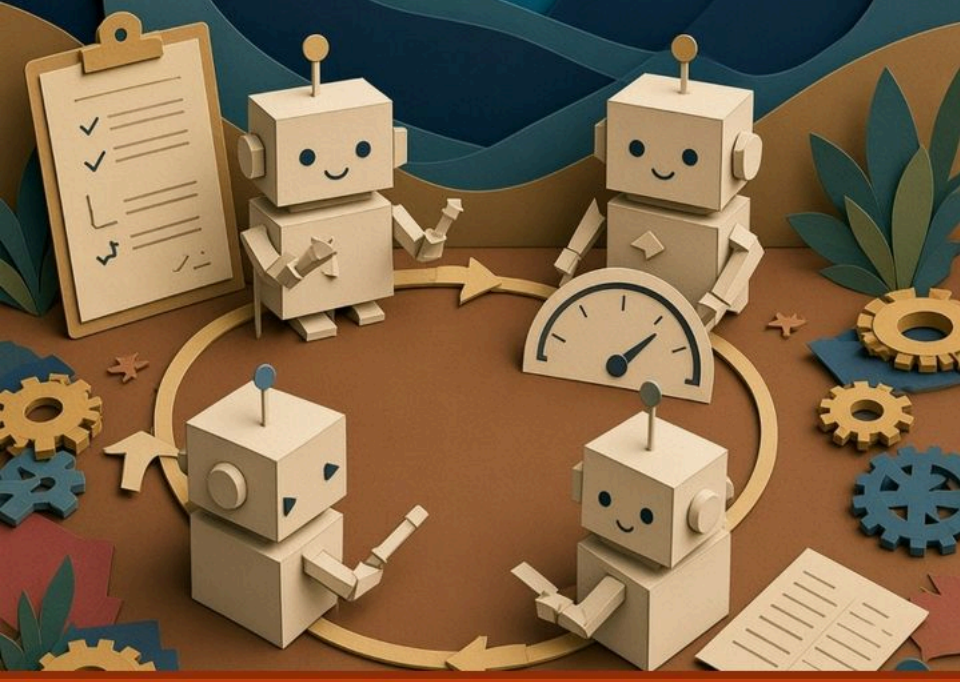

https://www.deeplearning.ai/courses/evaluating-ai-agents

07

Made With ML

Deploy + monitor habits.

https://madewithml.com/

HOW TO RUN THE PATH

Order matters. *Ship* at the end.

1. Run the courses in the order listed. Each one builds on the one before it.

2. Finish one course before you start the next.

3. After step 3, ship your first small AI app so the ideas stick.

4. At the end, build one real thing and ship it.

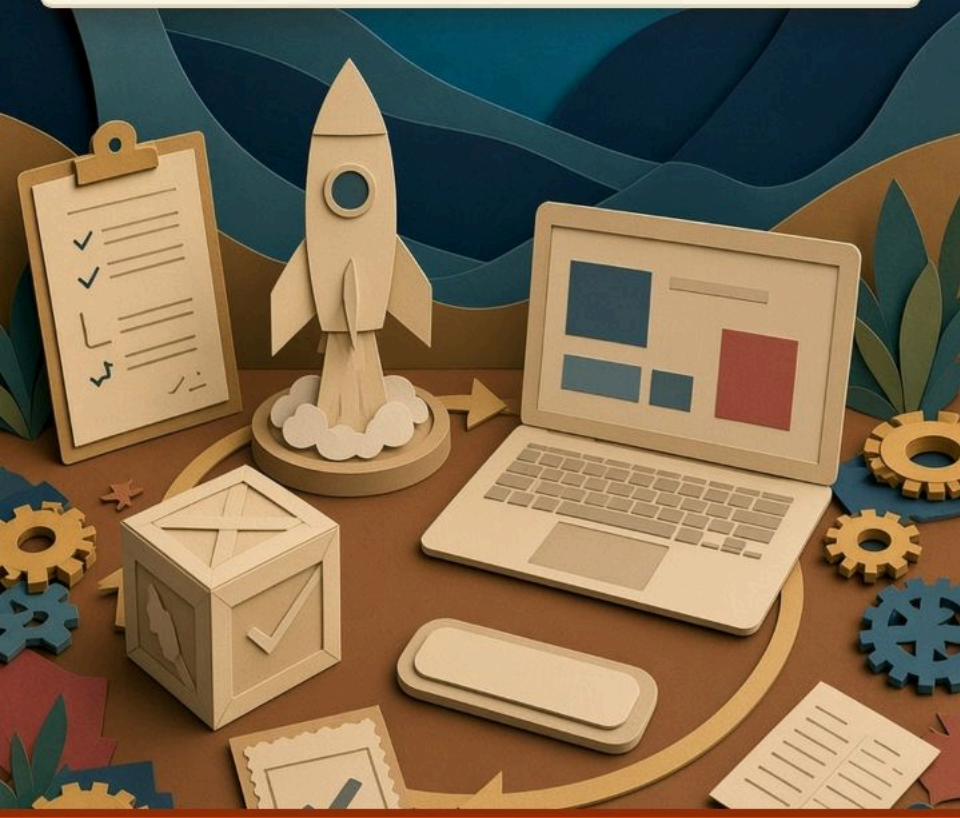

PROJECT IDEAS FOR THE END

A document search app.

A research agent with citations.

A support agent that proposes refunds for approval.

Deploy it and improve from real feedback.

MOMENTUM
AI INSTITUTE

NEXT STEP

Save this and run the steps *in order*.

Want to work through it with other builders doing the same?
